EDUCATION

- **Politecnico di Milano** Milan, IT
Bachelor's degree in Software Engineering *Sep. 2022 – Present*

EXPERIENCE

- **Freelancer** Milan, IT
Web Developer *Jun 2023 – Present*
 - **Client Collaboration:** Worked directly with clients to gather requirements and deliver web solutions that align with their business objectives and user needs.
 - **Development:** Utilized modern web technologies and frameworks to build interactive websites.
 - **CMS Implementation:** Implemented and customized content management systems (CMS), empowering clients to manage their content easily.
 - **SEO Optimization:** Applied SEO best practices, improving page rankings and increasing organic traffic.
 - **UI/UX Design:** Designed user-friendly, visually appealing interfaces, ensuring an intuitive user experience.
 - **Maintenance and Support:** Offered post-launch support and troubleshooting, handling updates, feature requests, and performance monitoring to ensure site reliability.

PROJECTS

- **LinkedTag** [GitHub](#)
Python, Flask, JavaScript, HTML, CSS *Dec. 2024*

Developed an AI-powered tool that analyzes posts and suggests you highly relevant hashtags for LinkedIn, boosting efficiency by 300% compared to manual selection. Designed with responsive UX/UI, including light/dark modes, to ensure a seamless user experience. Focused on creating a functional and impactful solution.
- **Trend Tribes** [GitHub](#)
JavaScript, PHP, WordPress, HTML, CSS *Feb. 2024*

Developed a custom WordPress theme with WooCommerce integration, featuring a minimalist design and responsive layout. Optimized to get a 2.5x faster e-commerce setup, with custom filters, user area, blog, reviews, contact form, and payment gateway for a seamless user experience.
- **Bricked** [GitHub](#)
JavaScript, HTML, CSS *Oct. 2023*

Developed a Tetris clone as a personal challenge to apply and enhance my programming skills. The game includes responsive design and integrated leaderboards, offering a seamless and competitive user experience.
