- **Date of Birth:** 08/12/2003

EDUCATION

- **Politecnico di Milano** Milan, IT
Bachelor's degree in Software Engineering *Sep. 2022 – Present*

EXPERIENCE

- **Freelancer** Milan, IT
Web Developer *Jun 2023 – Present*
 - **Client Collaboration:** Worked directly with clients to gather requirements and deliver web solutions that align with their business objectives and user needs.
 - **Development:** Utilized HTML, CSS, JavaScript and frameworks to build interactive websites.
 - **CMS Implementation:** Implemented and customized content management systems (CMS) such as WordPress, empowering clients to manage their content easily.
 - **SEO Optimization:** Applied SEO best practices, improving page rankings and increasing organic traffic.
 - **UI/UX Design:** Designed user-friendly, visually appealing interfaces, ensuring an intuitive user experience.
 - **Maintenance and Support:** Offered post-launch support and troubleshooting, handling updates, feature requests, and performance monitoring to ensure site reliability.

PROJECTS

- **Trend Tribes** [GitHub](#)
HTML, CSS, JavaScript, PHP, WordPress *Feb. 2024*

I developed a custom WordPress theme integrated with the WooCommerce plugin, focused on a minimalist design and quick setup for fast ecommerce site launches. The project includes features such as responsive design, custom filtering system, user area, blog, reviews, contact form, and payment gateway.
- **Bricked** [GitHub](#)
HTML, CSS, JavaScript *Oct. 2023*

I created this game as a personal challenge, applying the knowledge I had gained to develop a functional project. The game features include responsive design and leaderboards.
- **AchrisGraphics** [GitHub](#)
HTML, CSS, JavaScript *Jun. 2023*

I developed a portfolio website to showcase the client's work in a visually appealing and professional manner, following their stylistic and artistic directives. The website includes features such as responsive design, a custom cursor, document downloads, and a contact form.
